Golang

Python

Java

PROFILE

I am a dedicated software engineer who also loves to introduce people to the world of programming as I believe this is where the future lies. This is also why I have a passion for teaching as I believe in empowering others with this valuable skill set. I strive for excellence in things that I do to ensure maximum satisfaction from my clients. I firmly believe that my skills will value add to your company.

SOFTWARE ENGINEER

Klass Engineering and Solutions

Key member of a team that developed a software where users are able to annotate images in a dataset, train an AI model and to export the trained model that is to be embedded into surveillance system that can perform real-time detection and classification. Worked on both the frontend and backend aspects of the project.

Lead frontend engineer of an enhanced speech-to-text recognition system that is able to decode Singaporean english audio into text while being able to highlight words as when the word is spoken in the audio.

Lead frontend engineer of a software to allow communication between a user and a robot via commands in the GUI.

Worked on a set of guidelines and templates for frontend engineers on a company level to adopt and practice to standardize the interfaces of projects within the company and to allow better code maintainability among developers.

●

INTERN WEB DEVELOPER

OnetoOne Interactive

Worked on the user interface for both the admin panel and the audience engagement panel, making sure they are mobile-friendly, intuitive and self-explanatory. Worked on backend to provide necessary APIs on the components that I worked on for my team to readily use.

Implemented a two-factor authentication system into their login mechanism in the backend and integrate it into the app on the frontend.

Developed an intuitive responsive website builder platform with modernized look and feel for clients to build a static webpage for their event.

TEACHING ASSISTANT

National University of Singapore

Undergraduate Teaching Assistant, responsible for conducting tutorial classes on programming methodology with Python as the programming language. Also responsible to grade online assignments and to review exam papers.

A head tutor for one of the semester. Carried supervisory responsibilities for all teaching assistants in the course and shall be required to liaise with heads of department in relation to this supervision.

Worked alongside students to tackle coding problems and programming concepts. Teaching expresses the virtues of patience, approachability and selflessness.

AWARDS / ACHIEVEMENTS

Nov 2016

1st Runner Up for NUS STePS

May 2017

2nd Runner Up for NUS STePS

A part of pioneer batch of students to develop VR games and showcase in the bi-annual NUS STePS event. Students present their projects in all aspects of computer science to Industry guests, Government agencies, Sponsors and Investors to connect with potential employers and to seek opportunities for further development of their work through collaboration.
